Big on details

THE FUTURE IS
CONNECTED

It can be that simple

We see ourselves as a system provider. This means that we listen to our customers and work hand in hand with our partners. The result: features that make sense.

“The alphasatronics ONE offers unique features that you wouldn’t expect from a SAT antenna!”

Operation via the Alpine navigation device is one of them.”

Michael Lenatz, Alps Alpine Development

You’re sitting relaxed in the driver’s seat and are ready to continue your journey.

Is the SAT antenna retracted? You’re not sure?

No problem: Your alphasatronics ONE SAT system can be conveniently controlled via the Alpine navigation system.

A feature that will delight you.

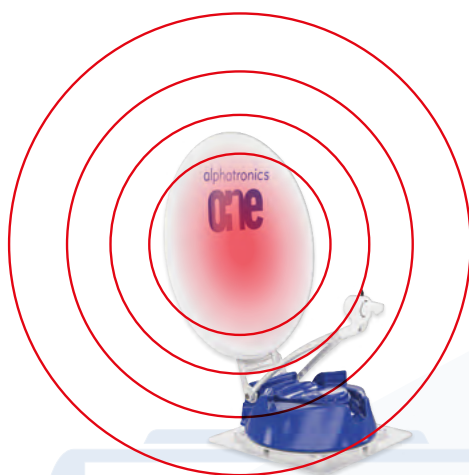

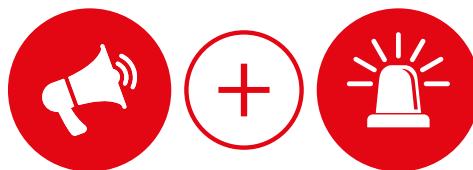

Convenient control of the alphanetronics ONE via the Alpine navigation system

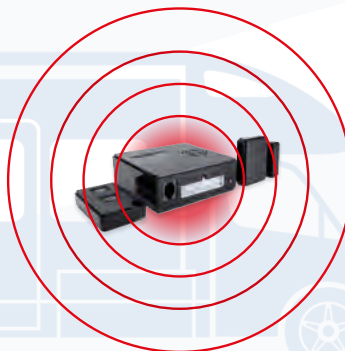

Retracting and extending the SAT system from the driver's seat

An increase in your safety

What do you get when two market leaders in their fields aren't satisfied?
Something unique! Discover the joint concept of THITRONIK® and
alphatronics – your motorhome will now be an extra bit safer.

alphatronics ONE

THITRONIK® alarm system

- + More attention at night
- + Effective burglary protection through an additional visual alarm from the alphatronics ONE
- + Convenient operation via the alphatronics ONE app

Light at night in particular is an effective way to protect against burglary. A well-lit house is demonstrably less likely to be visited by criminals. The same goes for your motorhome. No burglar likes to be caught in the act.

How does that work? The answer is quite simple: In the event of an alarm from the THITRONIK® system, the alphasatronics ONE also starts to light up immediately. You define in advance in the alphasatronics ONE app whether this is done as a flash or other light signal.

“Innovative, unique, impressive?
For us, something much more important
was our priority: your safety!

With the alphasatronics ONE in combination
with our THITRONIK® alarm systems, we offer
you another building block for more security.”

Mark Thietje, THITRONIK® Managing Director

Your THITRONIK® alarm systems offer you reliable protection for your motorhome. And as of now, another factor for more safety is added: the integration of your alphasatronics ONE SAT system as an additional visual signaller.
